P7: Create your personal portfolio website
Due Date: 19th November 2021

For this assignment, you will apply the design principles from this semester to create a personal portfolio website that you could share for job interviews.

Portfolio Details

- Your portfolio website should have the following elements:
- A landing page with at least two showcase projects (E.g., projects from this class). Make these visually appealing.
- You should be able to click on at least one of the projects to read/see more information.
- A link to your resume (you can either create a resume in HTML or link to an external document).
- A link to your bio, also created with HTML and CSS.
- Access to personal contact information.
- Some kind of menu or navigation system for your site.

What to Hand In

Publish your portfolio on GitHub and submit the link to your code and to the published site. See instructions on how to publish a page using github.io here: https://pages.github.com/

For this assignment please do **not** use existing CSS templates or frameworks. Your site should be responsive.
